| IDENTIFIERS | *Hawaii |

ABSTRACT

This study compares the characteristics of the 3,537 Hawaii community college students who took only evening credit courses in fall 1975 with day-only students and students enrolled in a mixture of day and evening courses. The evening-only student group comprised 17 percent of the total enrollment. In all three groups the majority were male, continuing students seeking a degree or certificate. Over 90 percent identified themselves as U. S. citizens and Hawaii as their permanent home. However, a greater percentage of students in the evening-only group were unclassified (23 percent compared to 6 percent for both the day-only and evening-day groups). There were also proportionately fewer general and pre-professional and vocational students in the evening-only group. Most of the evening-only students were part-time (78 percent). In contrast, the majority of day and evening-day students were full-time (66 and 72 percent respectively). The average age of the evening student was 31.8 years, 8 years older than the day student and 5 years older than the evening-day student. This report presents data for each of the seven Hawaii community colleges, and provides comparative data for the fall 1972 and spring 1975 semesters. Tables of data are appended. (Author/NHM)

# EVENING STUDENTS
# COMMUNITY COLLEGES
# FALL 1975

Previous reports on students attending evening credit classes have aroused considerable interest at the community colleges. Since these students comprise an integral part of a college's clientele, they draw upon a college's resources in terms of facility utilization, faculty assignment, etc. Information about them has been useful for various planning purposes.

The emphasis of this report is on the fall 1975 regular students who took only evening credit courses. For the purpose of this report, evening courses are defined as those (1) starting after 5:00 p.m. or (2) starting before 5:00 p.m. but 50 percent or more of the instructional time after 5:00 p.m.*

The evening-only students are compared with two other groups of students: (a) students who were enrolled in day-only courses before 5:00 p.m. and (b) students who were enrolled in a mixture of evening and day courses. Data on Hawaii Community College evening students are included for the first time. Further comparisons are made with the fall 1972 and spring 1975 evening students.

Sources: Student Information System--student personal history/registration files at the end of the semester. (The enrollment figures are not the same as those reported in CC-IRP 83, Selected Characteristics, Fall 1975, because that report is based on the beginning of semester figures.)

## HIGHLIGHTS

1. The evening-only student group (3,537) comprised 17 percent of the total enrollment, the day-only, 69 percent, and the evening-day, 14 percent (Table I). These percentages are very similar to those reported for the spring 1975 group. The proportion of evening-only students ranged from 8 percent at Honolulu to 37 percent at Kauai.

2. The three groups of students were similar in several ways (Tables II and III):

   a. The majority of students were males.

   b. Most were "continuing" (registered during the previous semester) students.

---

*Previous evening reports (CC-IRP 52, 78) were based on courses held after 5:00 p.m.

c. At least a majority of the evening-only students were classified students, i.e., seeking a degree or a certificate. (52 percent, Honolulu to 91 percent, Leeward.)

d. Well over 90 percent were U.S. citizens with Hawaii as a permanent home address and residency.

The evening-only group, however, differed from the day-only and evening-day groups:

a. A greater percentage of students in the evening-only group were unclassified (23 percent compared to 6 percent for both the day-only and evening-day groups). There were proportionately fewer general and pre-professional and vocational students in the evening-only group.

Vocational majors comprised 33 percent of the total evening enrollment. Most notable were large enrollments in the management (224), police science (165) and accounting (157) programs. Very few students were enrolled in technology programs, probably reflecting the course offering patterns at the colleges.

b. As expected, most of the evening-only students were part-timers (78 percent). In contrast, the majority of day and evening-day students were full-time students (66 percent and 72 percent respectively). The average credit hour of the evening-only student was 6.9; day only, 11.7; and evening-day, 12.6.

c. A majority of evening students were married (55 percent). In contrast, most of the day and evening-day students were single (78 percent and 60 percent respectively).

d. The average age of the evening student was 31.8 years, 8 years older than the day-only student (23.2 years) and 5 years older than the evening-day student (26.2 years).

The majority of evening-only students were pre-1971 high school graduates. In contrast, the majority of day-only students were 1975 high school graduates.

3. Table IV: The fall 1975 evening-only enrollment of 3,537 was 27 percent more than spring 1975 (2,796) and 170 percent more than fall 1972 (1,310). (This may have been partly due to the inclusion of Hawaii Community College and/or the changing of the time-factor in describing evening courses.)

a. Proportionately more of the fall 1975 evening students were males, married, and Hawaii residents. They were also older than their counterparts of the previously reported semesters.

b. More students were classified as vocational (33 percent) and liberal arts (44 percent) majors compared to spring 1975 (29%/41%) and fall 1972 (15%/41%).

c. The fall 1975 evening student took more credits compared to the evening students of earlier reports. Reflecting the increase in the number of the evening students, the SCH generated by the evening students increased: 38 percent more than spring 1975 and 308 percent more than fall 1972. The average SCH for the fall 1975 evening group was 6.9 compared to 6.3; and 4.5 for the previous two groups.

## SUMMARY

The number of students enrolled in evening credit classes only was almost thrice the number reported in fall 1972. They were older than their counterparts of four years ago and took more courses. What can the colleges do to provide these students with a curriculum that will meet their needs? What kind of student services do they need?

TABLE I
